## PROFESSIONAL EXPERIENCE

### 1. Programmer Analyst

#### Cognizant

oct 2021 – Present

- Wrote linux script for automating the server health check which was a day to day important work.
- Installing and maintaining operating environments, Monitoring these operating environments.
- Documenting all reported malfunctions and actions taken in response, Updating any software and hardware where necessary .

Tools: Tibco bpm, Linux, Tibco Streambase

### 2. QEA Intern Cognizant

#### Cognizant

April 2021 – July 2021

- Based on Requirement performed testing on the website manually and Automatically using Selenium width Java. and created several QEA report based on test cases

Tools: java, selenium, x-path, maven.

### 3. IOT Trainee

#### WebTek Labs

July 2020 – Oct 2020

- Worked on Raspberry Pi 4 and Arduino

Tools : HTML, CSS, Javascript, Canvas and Angular.

## EDUCATION

B.Tech EEE - Maharaja Surajmal Institute of Technology (MSIT) ,IP University (GGSIPU)

2018-2021 CGPA: 9.08

Diploma Electrical Engineering- Pusa Institute of Technology

2018 Percentage :80.08

Class 10 - Andhra Education Society NT RM sr sec school

2015 CGPA: 7.8

## CERTIFICATIONS

- React js
- Tailwind CSS
- React Query

## SKILLS

- Programming Languages:** C++ , C, HTML, JavaScript, CSS, JSX, Python, Java, SASS
- Skills:** Data Structures and Algorithms (DSA) , Website Development.
- Frameworks:** React.js, CSS Frameworks (Material UI, tailwind css).
- DB language:** SQL.
- Tools :** Git, VScode, npm/yarn, maven.
- Testing :** Jest, Cypress, familiarity with Selenium.
- Design :** Figma, Adobe Illustrator, Adobe Photoshop.

## PROJECTS

- Budget Tracker v2.0** using **ReactJS** and **Context API, React Router:**  
A Budget Tracking App v2.0 this have user auth, monthly expense chart and summary of expense and good UI and data Filtration.  
[Live | V1.0 | github | video](#)
- Tru Note v2.0** using **ReactJS** and **Context API :**  
TruNote a Notes taking website better at managing the notes then it's previous version it have Archive, Trashing, and pinning notes (Google keep ) Functionality.  
[Live | V1.0 | github | video](#)
- Todo List** using **Javascript, HTML, CSS, Drag and Drop API:**  
To do list App with CRUD operations and Drag and drop functionality  
[Live | github](#)
- joke Teller** using **JavaScript, HTML, CSS & API:**  
a joke teller website speaks a programming joke everytime when button is clicked  
[Live | github](#)
- All Computer Science Engineering (CSE) Projects -** [Github](#).

## ACHIEVEMENTS

- Wrote a server health check linux script to remove manual task and saved plenty of time for other things.
- Part of design team in college fest.
- Earned **Problem Solving** Certificate from Hacker Rank. .
